

Make a 3D reindeer head

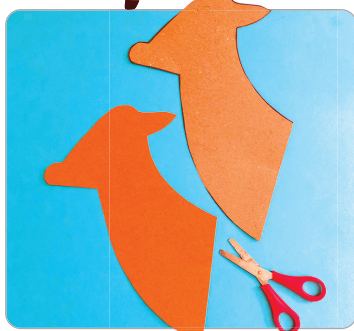

What you need

- Marker pen
- Cardboard
- Scissors
- Double-sided tape or glue
- Red paper or card
- String
- Sticky tape

Although Christmas is just around the corner, there's still time to get creative and deck the halls with your very own cardboard reindeer head. Using recycled cardboard as the main material, you can make it as big as you like and get as festive as you feel by adding some fun finishing touches.

1 Draw out the side profile shape of a reindeer's head and neck on a piece of cardboard.

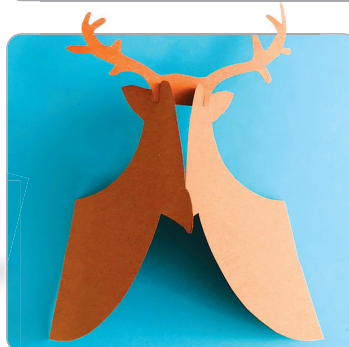

2 Cut it out, then draw around this one on another piece of cardboard, so you have two heads.

3 Stick the noses together using double-sided tape or glue.

4 Draw antlers and a rectangular base on cardboard. Cut out and cut two slits into the base.

5 Slot the base of the antlers onto the reindeer heads.

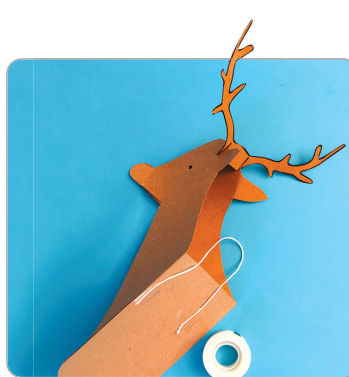

6 Cut out a mount from card (as above) that is slightly longer than your reindeer's neck length.

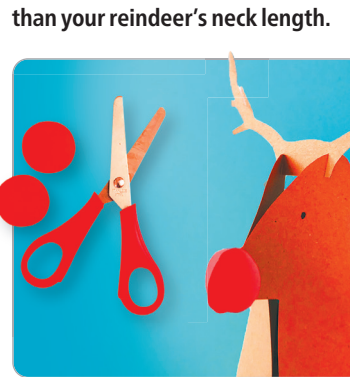

7 Fold over the straight edge on the reindeer necks and stick them on either side of the mount.

8 Draw on eyes with the marker pen and bend the ears forward.

9 Tape a loop of string onto the back of the reindeer, so it can be hung up on the wall.

10 Then, cut two circles from the red card. Fold them in half and stick to either side of the nose.
